# Occupy Peace and Freedom? Bay Area General Assembly

Sunday, December 18, 2011 • 1pm-3:30pm

The past year has been exciting, and next year promises to be even more so, as we move into the presidential elections of 2012. As the only working class, feminist, and socialist party on the ballot in California (and probably the US), the Peace and Freedom Party is uniquely situated to act as the electoral arm of the OWS movement. Yet in spite of the fact that our Platform speaks effectively to the issues raised by OWS, and that many individual PFP activists are deeply involved, the PFP leadership structure has failed to respond to the opportunities opened by the OWS movement.

This Assembly is not intended to replace the old leadership and central committees which played an important role in enabling the Peace and Freedom Party to survive for forty years, but survival is no longer enough. We must come up with new ways of engaging the revolutionary opportunities of the coming years, and the purpose of this Assembly is to begin a new process within P&F.
